

HEALTH CERTIFICATE

We hereby certificate that our products meet the EU rules 1935/2004 dd. 27th October 2004 concerning materials and objects destined to come into contact with food products and the D.M. dd 21.03.73 until the current D.M. of 26.04.93 (Italian law) i.e. the application of E.C. legal requirements relating to the legislation of plastic materials and articles which come into contact with foodstuffs.

The raw materials used are polypropylene, polystyrene, P.L.A. and muster. They are guaranteed by our suppliers as first quality and atoxic materials, which can be used to manufacture articles that will be in contact with foodstuffs.

We actuated an "inside-check HACCP" D.L. 155/97 to grant to our customers the top of safety in terms of hygiene and quality of the products. The transformation of the raw material into the finished products consists of a casting process at 250 degrees. The aseptic products are immediately packaged.
